TEMPERATURE CONVERTER IN PYTHON

PHASE I REPORT

Submitted by

AKSHAYA K 711321103005

in partial fulfillment for the award of the degree of

BACHELOR OF TECHNOLOGY IN

CHEMICAL ENGINEERING

DEPARTMENT OF CHEMICAL ENGINEERING

KPR INSTITUE OF ENGINEERING AND TECHNOLOGY

ANNA UNIVERSITY, CHENNAI

DECEMBER 2024

BONAFIDE CERTIFICATE

Certified that this project report "TEMPERATURE CONVERTER IN PYTHON" is the bona-fide work of "AKSHAYA K (711321103005)" who carried out the project work under my supervision.

Submitted for the viva voce examination held on…….

INTERNAL EXAMINER **EXTERNAL EXAMINER**

ACKNOWLEDGEMENT

We wish to express our heartfelt thanks and gratitude to our honorable Chairman **Dr. K. P. RAMASAMY,** KPR Group of Institutions, for providing the facilities during the course of our study in the college.

We express our sincere gratitude to our respected Chief Executive **Dr. A. M. NATARAJAN, M.E., Ph.D.,** beloved Principal **Dr. D. Saravanan M.Tech., Ph.D.,** KPR Institute of Engineering and Technology, who gave us the opportunity to frame the project to the full satisfaction.

Our gratitude to **Dr. G. ANUSHA** Professor, Head of the Department of Civil Engineering, for her valuable support and encouragement during this project work.

We are grateful to **Dr. S. PRANAV** Assistant Professor, Department of Chemical Engineering, the project supervisor for his timely suggestions and constant encouragement and support that led to the accomplishment of the project.

The acknowledgement would be incomplete without a word of thanks to all our parents, faculty members, supporting staff and friends for their continuous support and sincere help throughout our project.

1. Project Overview

The Temperature Converter is a Python-based project that allows users to convert temperatures between Celsius and Fahrenheit. This simple yet functional tool demonstrates basic concepts of Python, such as:

- Input/Output
- Conditional Statements
- Functions
- Error Handling

2. Objective

The main objective of this project is to provide an easy-to-use tool that:

- Converts a given temperature from Celsius to Fahrenheit.
- Converts a given temperature from Fahrenheit to Celsius.

3. CODE

```
def main():
    print("Welcome to Temperature Converter!")
    print("1. Convert Celsius to Fahrenheit")
    print("2. Convert Fahrenheit to Celsius")

    choice = input("Enter 1 or 2: ")

    if choice == '1':
        celsius = float(input("Enter temperature in Celsius: "))
        fahrenheit = celsius_to_fahrenheit(celsius)
        print(f"{celsius:.2f}°C is equal to {fahrenheit:.2f}°F")
    elif choice == '2':
        fahrenheit = float(input("Enter temperature in Fahrenheit: "))
        celsius = fahrenheit_to_celsius(fahrenheit)
        print(f"{fahrenheit:.2f}°F is equal to {celsius:.2f}°C")
    else:
        print("Invalid choice! Please enter 1 or 2.")
```
